EDUCATION

California State University, Bakersfield

Bachelor's Degree in Computer Science, Minor in Japanese

Expected December 2026

Bakersfield, CA

RELEVANT COURSEWORK

- Artificial Intelligence
- Database Systems
- Linux Administration
- Software Engineering
- Advanced Web Programming
- Discrete Structures
- Algorithm Analysis
- Application Development
- Operating Systems

EXPERIENCE

Instructional Student Assistant

California State University, Bakersfield

Jan 2025 – Present

Bakersfield, CA

- Introduce the fundamentals of **Object-Oriented Programming (OOP)** and **Procedural Programming** to over **250+** students.
- Guide students through data structures, algorithms, and coding styles with practical laboratory assignments, contributing to a **5-10%** improvement in grades and knowledge.
- Produce **C++** coding assignments for **2** lab sections, focusing on real-world applications.

Code Sensei

Code Ninjas

Oct 2025 – Present

Bakersfield, CA

- Instructed students ages 7-14 in foundational programming concepts such as, **JavaScript**, **game development**, and **problem-solving**, improving students' lesson completion rate by **25%**.
- Facilitated hands-on coding projects and debugging sessions, helping students build and deploy games while reducing average issue resolution time by **30%**.
- Maintain an engaging learning environment for student progress, contributing to over **90%** of student retention and positive parent feedback.

UI/UX Designer and Web Developer

FWD: Dynamics

Jul 2025 – Jan 2026

Bakersfield, CA

- Designed and developed responsive websites and applications, focusing on promoting digital equity for **over 230** schools across Kern County.
- Collaborated in a team of **15+** developers, designers, and administrators to ship websites and applications.
- Helped develop tools and resources for Computer Science and STEM-related learning, contributing to a **50% boost** in student enrollment to tech-related programs.

PROJECTS

QuickQR | Astro, React, TypeScript, Supabase

- Co-created a QR code generator web app that uses third-party APIs that creates static and dynamic QR codes, handling **over 1000** requests a day.
- Enhanced user experience through advanced QR code customization features, increasing user engagement and interaction rates by **30%**.
- Built scan tracking and analytics, providing real-time insight on user engagement, improving data visibility by **40%**.

Cook It Up | Expo, React Native, Typescript, OpenAI

- Developed a mobile app that leverages OpenAI's chat completion API to generate personalized recipes, generating over **500+** unique ingredient combinations comprised of user-inputted ingredients, dietary restrictions, and preferences.
- Implemented a dynamic recipe generator that adapts to user inputs, ensuring recipes are tailored to **over 15** dietary needs and restrictions.
- Created a step-by-step recipe guide within the app, enabling **more than 90%** of users to successfully follow recipes regardless of prior cooking experience.

TECHNICAL SKILLS

Coding Languages: C, C++, Python, Java, HTML/CSS, Javascript, Typescript, SQL, PHP

Developer Tools: Git, Visual Studio Code, IntelliJ, Vim, Linux

Frameworks: Express, React, Expo, Astro, Flask, React Native

Skills: Communication, Customer Service, Collaboration, Teachability, Time Management
